

Viasat Offers Business Aviation Customers Double the Speeds on its Ku Advanced Network

September 5, 2019

New Plans Offer Greater Flexibility, with Speeds Up to 10 Mbps, Enabling Passengers and Crew to Remain Productive and Entertained During all Phases of Flight

CARLSBAD, Calif., Sept. 5, 2019 /PRNewswire/ -- Further enhancing the in-flight connectivity (IFC) experience for Ku Advanced value-minded business jet owners by blending flexibility with performance, [Viasat Inc.](#) (NASDAQ: VSAT), a global communications company, today announced new increased speeds, service packages and hardware incentives. The new high-speed IFC business aviation service packages will enable new and existing Ku-band customers the ability to upgrade their connectivity solution with faster speeds and enhanced experiences across the world's most heavily traveled flight routes.

The new Viasat Ku Advanced packages are available now with increased speeds up to 10 Mbps (resulting in a doubling of speeds for most existing customers), rollover of unused data allowances, regional and hourly service plans and the ability to stream audio and video content. Current and future Viasat business aviation customers are now able to take advantage of Ku Advanced increased speeds with near global coverage and an easy migration path to Viasat's Ka-band system through use of existing aircraft wiring.

"Today's offerings give business jet owners with legacy aircraft and Ku radomes, the ability to deliver an enhanced experience," said Claudio D'Amico, business area director, Business Aviation, Viasat. "We continue to add more capabilities to our network—enabling us to give business jet owners more choice in selecting an in-flight connectivity service package that meets their in-flight internet needs and budget. Our solutions enable customers to find the right balance between capital and operational costs while taking advantage of an enhanced connectivity experience."

To find out more about Viasat Ku Advanced hardware incentives or the new service plans, please email Viasat at business-aviation@viasat.com, or visit [Viasat Global Ku Advanced](#).

Forward-Looking Statements

This press release contains forward-looking statements that are subject to the safe harbors created under the Securities Act of 1933 and the Securities Exchange Act of 1934. Forward-looking statements include statements about the ability for customers to upgrade their connectivity solution with faster speeds and enhanced experiences, and the migration path to Viasat's Ka-band system. Readers are cautioned that actual results could differ materially from those expressed in any forward-looking statements. Factors that could cause actual results to differ include: risks associated with satellite failures, including the effect of any anomaly, operational failure or degradation in performance; product defects; manufacturing issues or delays; regulatory issues; and technologies that do not perform according to expectations. In addition, please refer to the risk factors contained in Viasat's SEC filings available at www.sec.gov, including Viasat's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. Readers are cautioned not to place undue reliance on any forward-looking statements, which speak only as of the date on which they are made. Viasat undertakes no obligation to update or revise any forward-looking statements for any reason.
