

Viasat Introduces Enhanced LAISR Service for Crewed and Uncrewed Airborne, Maritime and Land Platforms

Sep 4, 2024

On-demand, managed L-Band service offers a cost-effective, flexible solution for government mobile users

CARLSBAD, Calif., Sept. 4, 2024 /PRNewswire/ -- [Viasat Inc.](#) (NASDAQ: VSAT), a global leader in satellite communications, today introduced Enhanced LAISR, its global mobility, on-demand managed L-band service offering communications flexibility for airborne, maritime and land users worldwide. It will deliver highly available, flexible, on-demand capabilities enabled by Viasat's [seamless, global L-band](#) space and ground network.

The [award-winning](#) L-band Airborne Intelligence, Surveillance and Reconnaissance (LAISR) solution was developed to meet specific government requirements. It delivers cost-effective, high-speed beyond line-of-sight (BLOS) satellite communications (SATCOM) connectivity for mobile platforms via low size, weight and power (SWaP) user terminals. Military operations benefit from all-weather resilience and 99.9 percent network reliability.

As government organizations increasingly rely on highly mobile crewed and uncrewed Intelligence, Surveillance and Reconnaissance (ISR) missions worldwide, they need reliable, consistent SATCOM connectivity to transmit large volumes of data. Enhanced LAISR service will deliver on-demand, managed L-band network access to customers around the world, ensuring users can access the service whenever and wherever it is needed.

Customers will use the new [Enhanced L-band Maritime Antenna \(ELMA\)](#) and soon-to-be available LAISR-COTM (comms-on-the-move) terminal to connect to Enhanced LAISR services. Additional terminals are in development to provide access to the Enhanced LAISR service and deliver reliable, high-speed, seamless connectivity and uniform global capabilities via a further reduced SWaP form factor.

Steve Gizinski, Chief Technology Officer of Viasat Government, said, "Enhanced LAISR is the latest example of Viasat's continuous focus on enhancing terminals and services to deliver additional value and resilience to our government customers as their needs evolve. With Enhanced LAISR, we are expanding upon the proven LAISR capability and our robust service level agreements to provide a highly flexible and accessible service to support crewed and uncrewed ISR missions worldwide."

Forward-Looking Statements

This press release contains forward-looking statements that are subject to the safe harbors created under the Securities Act of 1933 and the Securities Exchange Act of 1934. Forward-looking statements include statements about the features, expected benefits and performance of the LAISR service and user terminals. Readers are cautioned that actual results could differ materially and adversely from those expressed in any forward-looking statements. Factors that could cause actual results to differ include: contractual problems, product defects, manufacturing issues or delays, regulatory issues, technologies not being developed according to anticipated schedules, or that do not perform according to expectations; delays in approving U.S. government budgets and cuts in government defense expenditures; and increased competition and other factors affecting the government and defense sectors generally. In addition, please refer to the risk factors contained in Viasat's SEC filings available at [www.sec.gov](#), including Viasat's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. Readers are cautioned not to place undue reliance on any forward-looking statements, which speak only as of the date on which they are made. Viasat undertakes no obligation to update or revise any forward-looking statements for any reason.
